ABSTRACT

The statistical data shown in this report are for the same 2,514 college and university libraries and five joint libraries which were included in the first report (Part A--ED 061996) for fall 1971. Information is presented here in four developmental areas: (1) the provision of library privileges beyond an institution's own students, faculty and staff; (2) a centrally organized collection of nonprint materials; (3) interlibrary cooperation; and (4) participation in Title III, Library Services and Construction Act (LSCA) programs. Additional information is provided for indexes of operating expenditures, collections and staff, and for regular library staff by term of appointment, type of position and sex. The questionnaire form and a list of new institutions are appended. (Author/SJ)

FOREWORD

Surveys of college and university libraries were initiated by the U. S. Office of Education for 1939-40 and conducted during the 1940's and 1950's at irregular intervals. During the 1960's, reports for individual institutions were provided for all years except 1964 and 1965. Analytic reports were released for 1960, 1962, 1964, 1968, and 1969. No survey was conducted during 1970.

The fall 1971 report will be issued in three parts. Part A of the institutional listing, already issued, provided basic statistics on the library collections, staffing, salary expenditures, hours of assistance and wages for hourly staff, and operational expenditures by function. Part B of the institutional listing contains supplemental information on the regular library staff, the extension of user privileges, the administration of nonprint materials, and various cooperative library activities. In addition, indexes concerning expenditures, collections, and staff are provided. An analytic report containing summary tables for all college and university libraries will be published at a later date.

This listing of 2,514 college and university and five joint libraries represents almost 86 percent of the universe, with inclusion depending on the completeness and timely submittal of replies. Since the data of this report are not necessarily representative of the universe, they should not be used to obtain aggregates.

The information contained in this report was collected as part of the Higher Education General Information Survey. The cooperation of numerous individuals and groups concerned with academic library statistics made this publication possible. Their assistance is greatly appreciated by the U. S. Office of Education.

INTRODUCTION

This report concerning academic libraries is a part of the U. S. Office of Education's sixth annual Higher Education General Information Survey (HEGIS). It presents detailed information respecting selected indexes, staffing patterns, and expanding developmental areas for college and university libraries. The survey instrument and instructions are reproduced in appendix I.

Scope of the survey

The data shown in this report (Part B) are for the same 2,514 college and university libraries and five joint libraries, almost 86 percent of the universe, which were included in the first report (Part A) for fall 1971. Some libraries submitted reports which could not be included in this publication due to incompleteness and lack of internal consistency. After resolution of these problems, such data will be incorporated into an analytic report.

Responses from "new" institutions or those with libraries in the process of being established were not included, since the reports of these libraries would not have been comparable with the other reports. In most such instances, there were no data for 1970-71, current staffing was quite small, and the collection had only recently been installed (see appendix II for a listing of these "new" institutions).

Expansion of the survey

Both Part A and Part B of the institutional reports provide library data for the first time for the branch campuses of multicampus institutions on the basis of "reporting units" as contained in the basic file of colleges and universities for the Higher Education General Information Survey. A "reporting unit" is defined as a single-campus institution, a main or branch campus of an institution with a single central administration, or an institution that is part of a multi-institutional system. The joint libraries, which represent two or more institutions or branches of institutions, have been included as quasi-reporting units for this survey.

This publication (Part B) presents information for the first time respecting four rapidly expanding areas. The first of these concerns the provision of library privileges beyond an institution's own students, faculty, and staff. Information is presented for seven categories of such extended user privileges: other higher education institutions, educational agencies other than higher education institutions, the educationally or culturally disadvantaged, the handicapped, the retired, the community at large, and other users.

The second developmental area concerns the provision of a centralized organized collection of audiovisual or other nonprint materials for faculty or students, according to three administrative locations of such a collection: as a part of the library, as an independent unit of the institution other than the library, and as a part of another academic or service unit of the institution.

The third area is that of interlibrary cooperation, which is divided into the following five categories: provision of materials on interlibrary loan, receiving materials on interlibrary loan, provision of copies in lieu of interlibrary loan, sharing computer facilities with other libraries, and participation in cooperative acquisition programs.

The last of these four developmental areas concerns academic library participation in Title III, Library Services and Construction Act (LSCA) programs. Information is given for the following five categories of this program: bibliographic services, communications network, reference services, technical processing services, and other Title III LSCA projects.

Four indexes presented in this report (Part B) that were not provided in the last (fall 1969) institutional report are: expenditures for library services to outside clientele as a percent of library total operating expenditures, 1970-71; budgeted library operating expenditures, 1971-72, per full-time-equivalent (FTE) student, fall 1971; number of librarians per 1,000 FTE students, fall 1971; and number of librarians as a percent of the total library staff serving on a regular basis (FTE), fall 1971.

This report also provides the number of regular library staff (FTE) according to three major categories that were not used in Part A: sex, term of employment (11-12 months, 9-10 months), and contributed services.

Tables

In all tables, institutions are listed alphabetically within each State; "U.S. Service Schools" and institutions in outlying areas are grouped at the end of each table. Brackets have been inserted in the margin to show the clusters of branches within a multicampus institution or of institutions within a "system" of institutions. Therefore, if the name of an institution is not found in its expected (alphabetic) position in the list, the reader should see whether the institution appears in one of the bracketed sets in the given State. Each of the bracketed sets contains the name of the multicampus institution or institutional system. When the name of the institution or system also bears the legend "all campuses" or "all institutions," the listing of components that follows is complete. Otherwise, one or more reporting units are missing.

Each reporting unit is identified (in column 2) by control:

PUB --- Public
PRI --- Private

and by type of institution:

U --- University
F --- Four-year institution
T --- Two-year institution.

In table 1, the indexes shown in all columns, except 6 and 11, were derived from other reports of the Higher Education General Information Survey. Because of differential reporting among the various segments, it was not always possible to obtain the appropriate denominator for a computation. In these instances, the symbol "NA," meaning "not available," has been printed. Whenever the numerator of an index was missing, a dash (-) was printed.

In table 2, the symbols "M" and "W" are used for "men" and "women."

In tables 3 and 4, positive entries were printed as "YES"; otherwise, a "NO" was printed. In table 3, it should be noted that whenever a reporting unit indicated that it extended user privileges to the "community at large," other entries in the same form for the provision of these services to segments of the community (see columns 5, 6, and 7) were indicated with asterisks as being a part of the "community at large" category. Those libraries which reported the provision of user privileges to groups other than those indicated were asked to specify the groups. Most of the libraries indicated one of the following:

1. Specialized libraries provided services to persons engaged in their particular specialty. For example, health sciences and medical school libraries were open to persons in the health professions, and seminary libraries were open to ministers and priests.

2. Alumni.

3. Correctional institutions (when located near them).

4. Local and State government employees.

5. Business and industry.

6. As an adjunct to public library needs.

DEFINITIONS

Publicly controlled institutions are those administered by local or State governments, as well as a few in which administrative control is by the Federal Government. All other institutions, including religious or theological, independent nonprofit, and a few profitmaking schools, are classified as privately controlled.

Institutions are classified as universities if they (a) give considerable stress to graduate instruction, (b) confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and (c) have at least two professional schools that are not exclusively technological. These criteria are the same as those utilized in previous reports in this series. Other 4-year institutions are classified as a single group. Two-year institutions are those offering programs of at least 2, but less than 4 years of college-level work. This definition is also the same as the one previously employed and is synonymous with the term "junior college" or "community college."

Volumes are defined as physical units of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which had been classified, cataloged, or otherwise prepared for use. Thus the volume count includes bound periodicals and cataloged Government documents, but excludes all microform. The latter was obtained separately as a count of microfilm reels plus the number of physical units of other forms of microtext (microcards, microprints, and microfiche units).

Periodicals are defined as publications issued in parts that usually contain articles by several contributors; they generally have distinctive titles, and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period. Periodicals are thus distinguished from such other serials as monographs, newspapers, annuals, proceedings, transactions, yearbooks, and recurring reports, for which data were not requested.

In this survey, library operating expenditure items were requested both as actual expenditures in 1970-71 and as budgeted expenditures in 1971-72. The request for budgeted expenditures was included in order to obtain current financial data for use by librarians in their budgeting work.

Librarians are defined as staff members doing work that requires training and skill in the theoretical or scientific aspects of library work, as distinct from its mechanical and clerical aspects.

Other professional staff are defined as personnel who, though not professional librarians, are in positions normally requiring at least a bachelor's degree.

Clerical and other staff are defined as personnel in receiving, shipping, storing, secretarial duties, etc. (excluding maintenance personnel); i.e., library staff whose duties do not require a knowledge of the theory of library work.

Data for all library staff are in terms of full-time equivalents.

Further details regarding definitions and other features of the survey are indicated in the questionnaire and accompanying instructions (see appendix I).

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

EXPLANATIONS AND INSTRUCTIONS

In this form, basic data are requested on the collections, staff, and expenditures for college and university libraries. The compilations of these data have proved to be valuable tools for administrators, chief librarians, and others concerned with the improvement of library services to higher education. The data also will assist in the administration of Title II of the Higher Education Act and other programs sponsored by State and Federal agencies.

The questionnaire has been simplified and made more relevant to today's academic libraries, compared with the preceding form of Fall, 1969. The items concerning mean salary and the distribution of full-time library staff by salary are not included in this form, to avoid duplication with the American Library Association's Salary Survey for 1970.

In addition to the collection of library operating expenditure data for 1970-71, such data are requested also for the current academic year, as expressed in the 1971-72 budget. New Parts IV and V have been added, to ascertain the developments regarding library services provided to clientele outside of your institution, interlibrary cooperation, community outreach, and audiovisual and/or other nonprint materials.

GENERAL INSTRUCTIONS

A. TIME PERIODS COVERED. Two periods of time *(1970-71 and 1971-72)* and two points of time *(end-of-year 1970-71 and fall 1971)* are involved in this survey. Library collection data *(Part I)* should be reported for both 1970-71 and end-of-year 1970-71. Salary expenditure data *(Part II, Section B)*, hourly staff data *(Part II, Section C)*, and funds received for library services provided to clientele outside of your institution *(Part IV)* should be reported only for 1970-71. Library operating expenditures *(Part III)* should be reported for both 1970-71 and the current academic year as expressed in the budget for 1971-72. The number of positions for the regular *(non-hourly)* staff *(Part II, Section A)* and the developmental areas data *(Part V)* should be reported as of fall 1971.

B. LIBRARY UNITS COVERED. Report consolidated data for all library units of your campus and for all library services provided by your library to clientele of your own institution as well as to clientele outside of your institution.

Fill out a separate form for the main campus and for each branch or other campus. Do not fill out separate forms for extension centers and research installations. Information concerning extension center libraries and research installation libraries should be reported on the form for the main campus; in the case of administratively equal campuses of a multi-campus institution, extension center libraries and research installation libraries should be reported on the form for the most closely related campus. Data on library services in separately budgeted research *("R and D")* centers should be included on the form for the appropriate campus.

If it is necessary to omit library data for any part of your campus, such as a law school library or a medical school library, write the name and address of the library unit(s) omitted from this report in item 9. Do not use item 9 to list library units whose data you included on this form.

C. NEED FOR ESTIMATES. Do not leave any items blank. Enter "O" if the appropriate entry for an item is zero or "none." If an exact figure is not available for a particular item, but the amount is known to be greater than zero, ENTER AN ESTIMATE of the amount. Indicate the estimated data by parentheses (   ). Estimates are important if exact data are not available for items such as the volume and item equivalents of material in microform *(lines 12 and 13)*, for Work-Study wages not charged to the library *(line 24, column (3))*, or for salary expenditures of library staff serving on a regular basis, and salary equivalents of contributed services library staff, 1970-71 *(lines 19 through 22)*. Items left blank may be misinterpreted and result in errors in the data-processing operations. Please request help from your business office in providing library expenditure and budget data.

D. QUESTIONS. If you have questions or need more copies of this form, please telephone Dr. Stanley V. Smith, *(202) 963-4587 (Library Surveys Branch, National Center for Educational Statistics, 400 Maryland Avenue, SW., Washington, D.C. 20202)*.

SPECIFIC INSTRUCTIONS

PART I - LIBRARY COLLECTION, 1970-71

E. VOLUME. For reporting purposes, a volume is a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and/or made ready for use.

F. PRINTED GOVERNMENT DOCUMENTS. A printed government document is any publication in book or serial form bearing a government imprint, e.g., the publications of Federal, State, local, and foreign governments and of world organizations, such as United Nations, European Common Market, etc.

G. MICROFORM AND MICROFILM. All forms of microform *(including microfilm)* are to be excluded from lines 10 and 11, but ARE TO BE REPORTED SEPARATELY on lines 12 and 13. If the number of reels or other units of microform are not separately available in your records, please estimate their number for purposes of providing separate data here.

H. PERIODICALS. A periodical is a publication issued in parts that usually contain articles by several contributors. It generally has a distinctive title and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period.

PART II - LIBRARY STAFFING, FALL 1971, AND LIBRARY EXPENDITURES FOR SALARIES AND WAGES, 1970-71

I. REGULAR AND HOURLY STAFF. REGULAR STAFF is defined as staff in full-time and part-time positions, usually serving with salary contracts. HOURLY STAFF is defined as non-regular staff. If your library has staff members who are paid on an hourly basis but who fill positions for which contract salaries are paid in most other libraries, it is preferable for the purposes of this survey to report such staff with the REGULAR STAFF. It is essential that positions be
